CATALOG H

CAMDEN POTTERY COMPANY

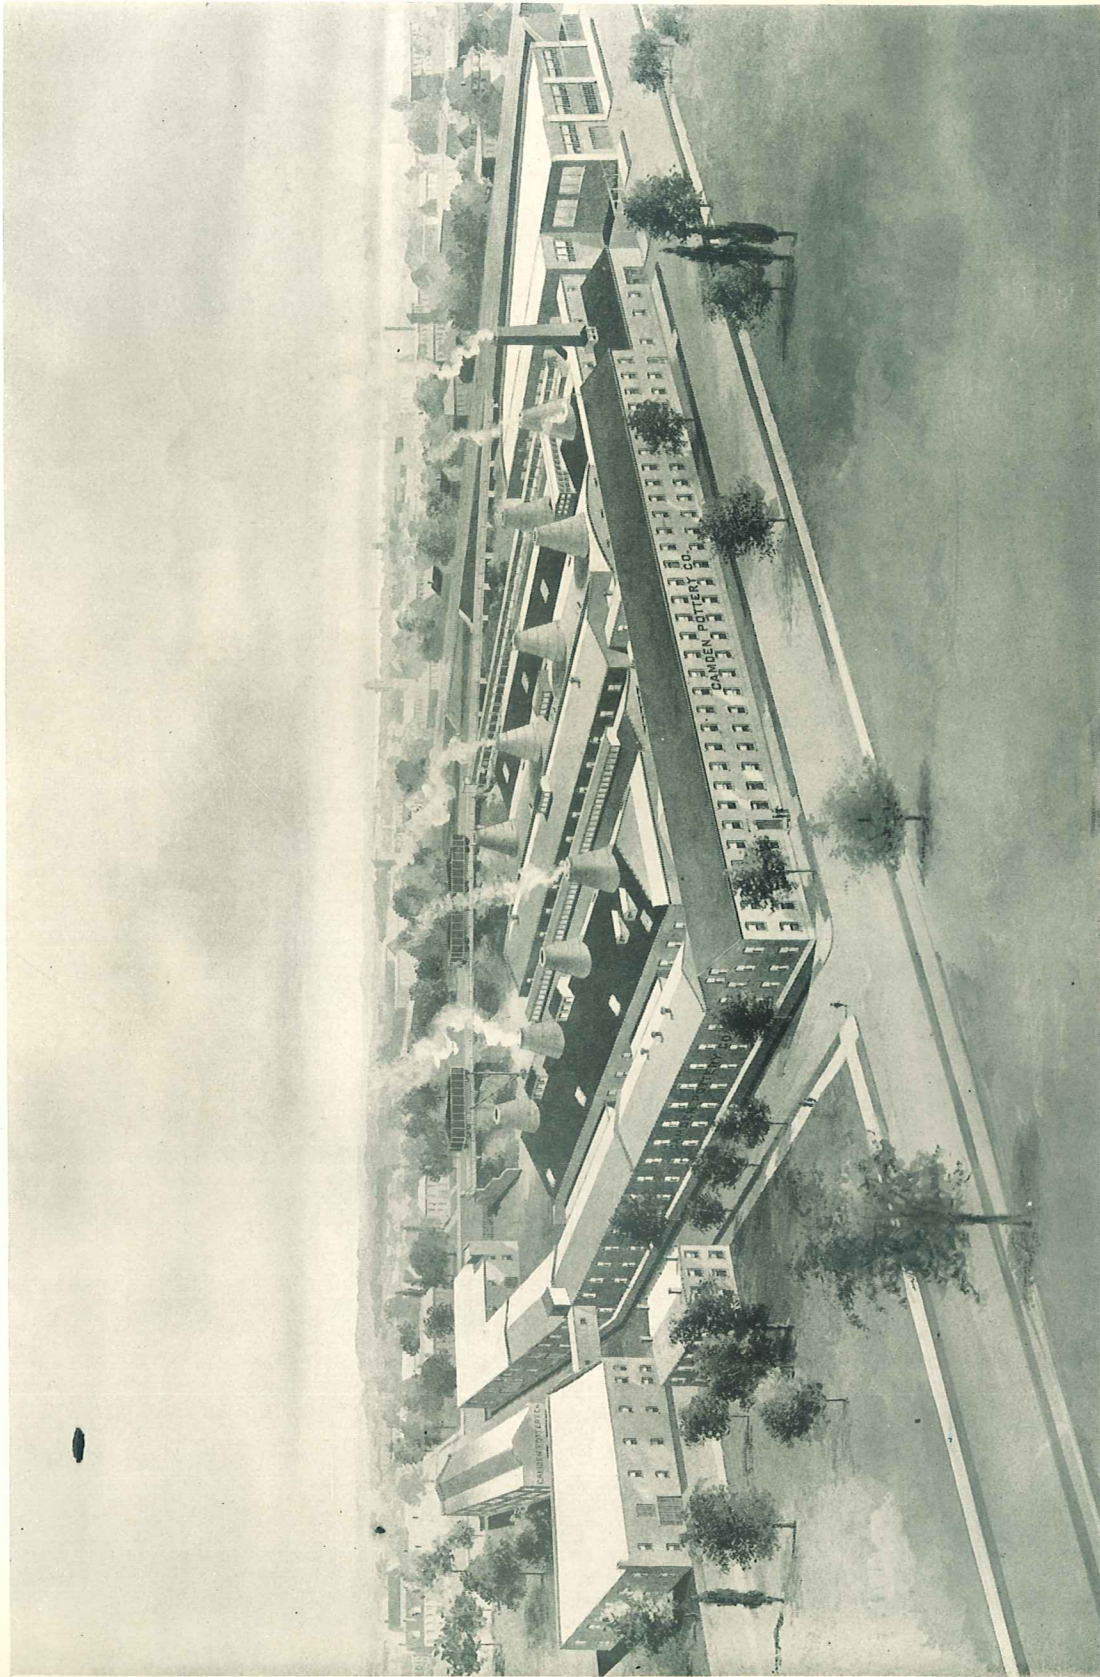

INCORPORATED

Main Office and Works

CAMDEN, NEW JERSEY

MANUFACTURERS OF HIGHEST QUALITY

TWO-FIRE VITREOUS CHINAWARE

THE HOME OF "CAPOCO" SANITARY EARTHENWARE

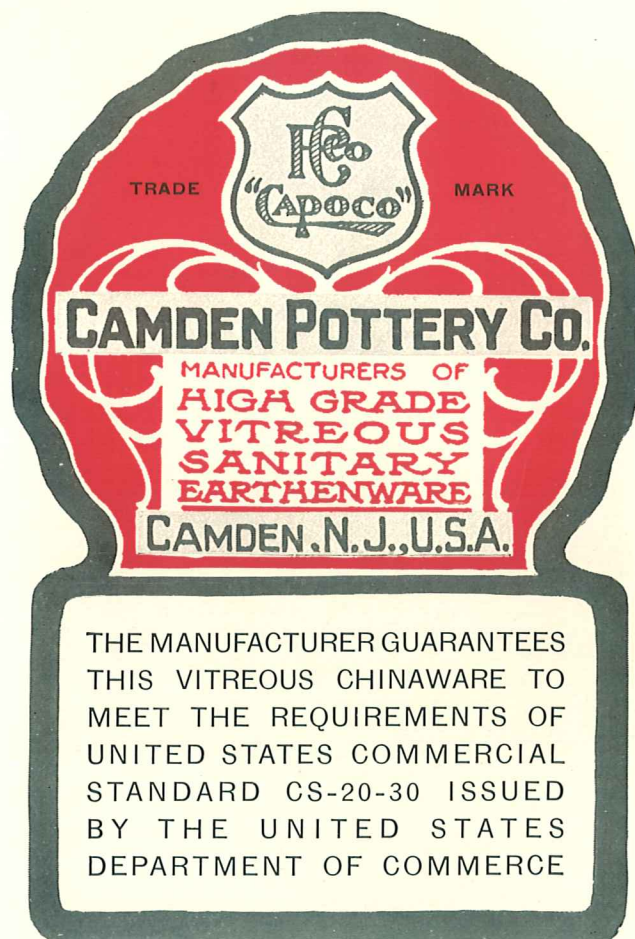

FOREWORD

We present this, our Catalog H, with a certain amount of justifiable pride, because we believe that it well represents our concern and properly illustrates the articles we manufacture. It is the eighth of a series of catalogs issued by the Camden Pottery Company.

Times and styles have changed since our first little Catalog A appeared. Most of the lavatories, closets and tanks shown therein have gone the way of the bustle, the mustache cup and the hansom cab. And yet one feature of each of those fixtures manufactured so many years ago is incorporated in every article shown in this Catalog — — — Quality.

It has always been the policy of our concern to furnish the finest quality material with the best possible service at a price commensurate with such quality and service. We are proud to say that we have customers on our books today with whom we did business thirty years ago. This, we believe, is due to the policy set forth above, and to the continuance of that policy we pledge ourselves anew.

Every piece of Capoco Vitreous China bears the above label, showing that it has been graded according to the grading rules established by the Bureau of Standards of the Department of Commerce.

Before this label is affixed, each piece of ware undergoes a thorough inspection, and the ultimate owner is assured of receiving Genuine Two-Fire Vitreous China ware of the first selection.

General Information

¶ We have arranged this catalog with the idea of giving complete detail of each fixture illustrated, and of causing our customers the least amount of difficulty in locating the information they desire. Each Lavatory and Closet Combination has complete roughing measurements on the back of the illustration. Pages showing separate closets carry necessary measurements incorporated in the descriptive matter. We also give complete weight for each fixture.

¶ We have taken great care in preparing our measurements and weights. In common with other manufacturers of vitreous china, we require a reasonable tolerance, and therefore cannot guarantee these measurements and weights to be absolutely exact.

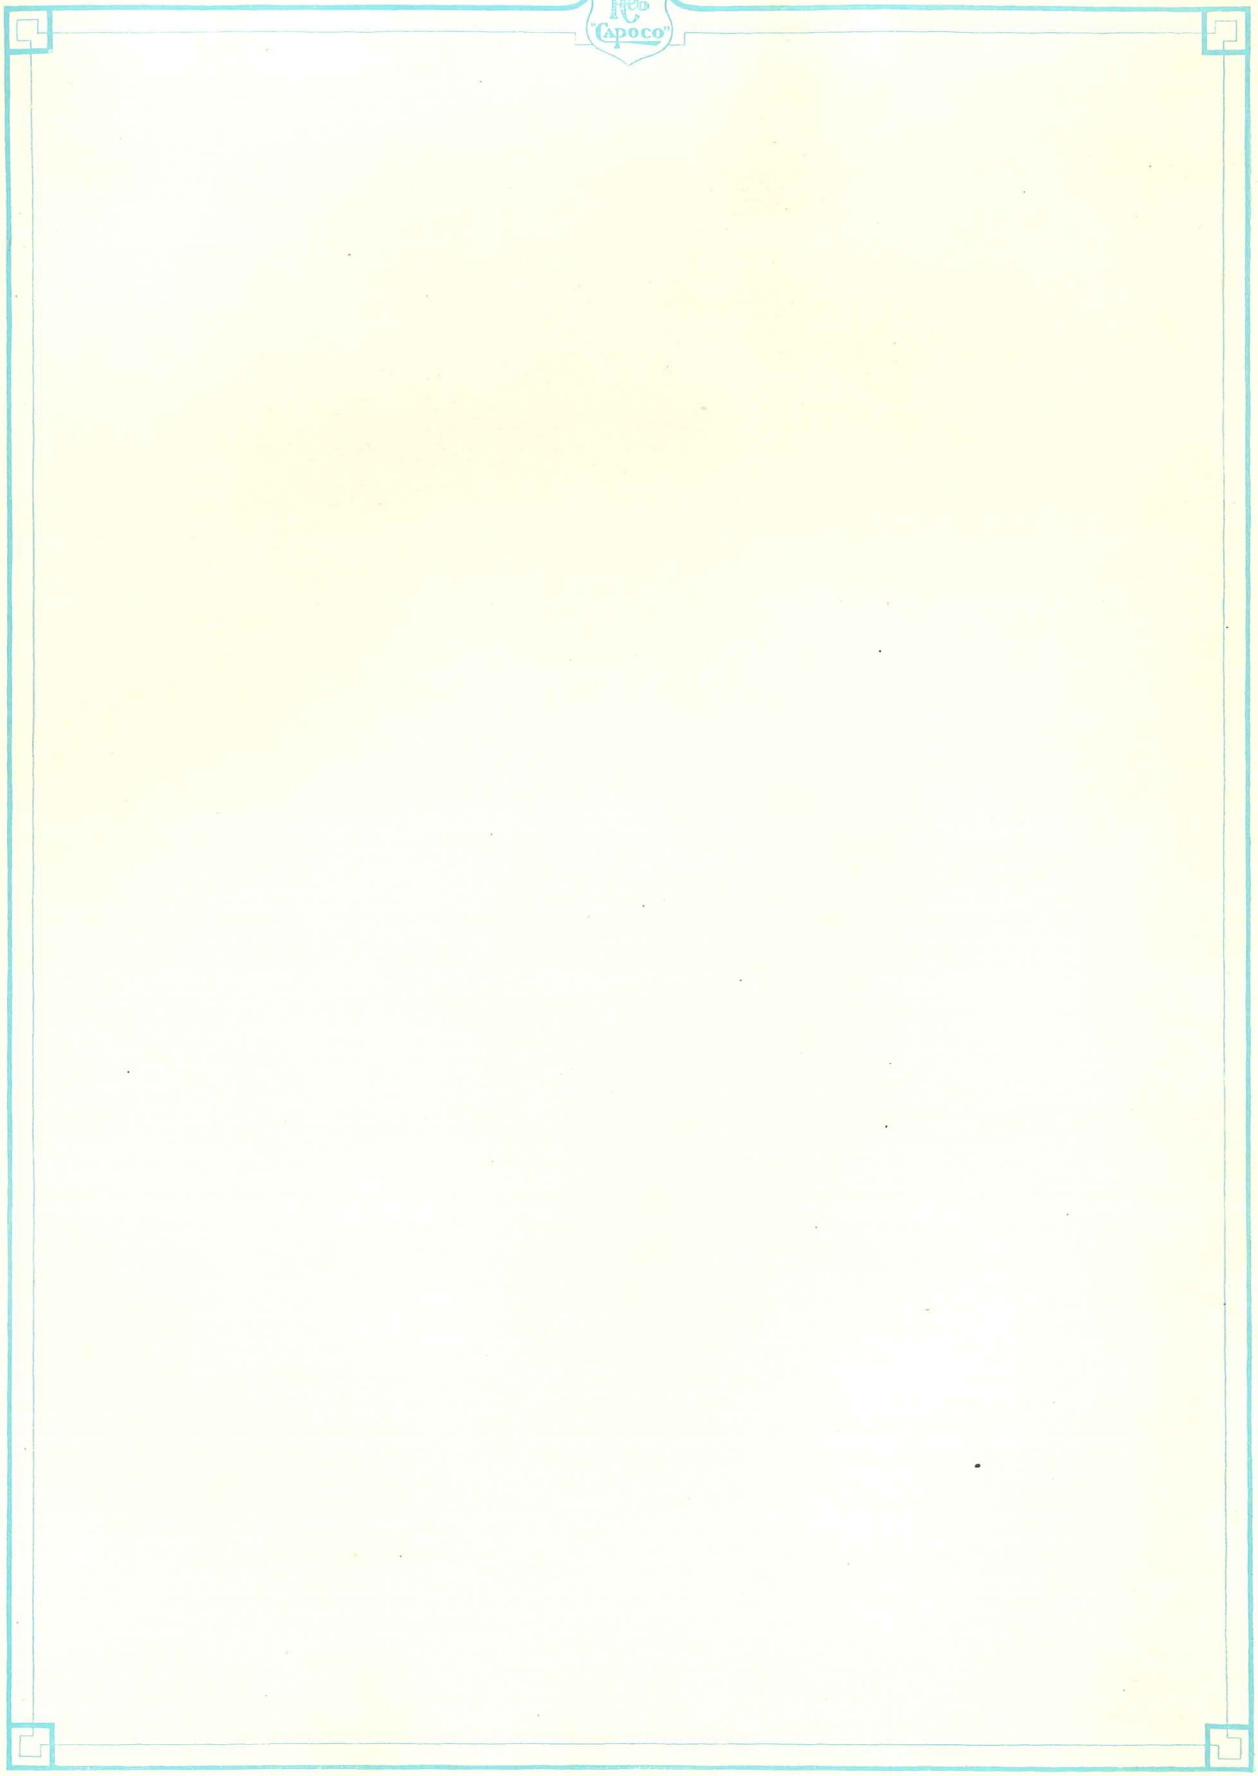

¶ We suggest that you order by Plate Number wherever possible, specifying whether the fixtures are to be furnished exactly as shown or otherwise.

¶ All goods are sold F. O. B. CAMDEN, with carload rate of freight allowed on carload and less than carload shipments. Claims for breakage in transit must be filed by the consignee.

¶ Customers must request permission before returning goods for credit.

¶ We gladly replace any defective fixture where the defect occurs within six months of installation, but we cannot be responsible for any labor charge or consequential damage.

¶ Camden Vitreous China is made of the finest materials procurable. It is two-fired to a maximum temperature of twenty-four hundred degrees Fahrenheit, producing a perfect fusion of the body and the glaze, and creating a ware that is non-absorbent, impervious to acids, and having a hard, flint-like surface which a damp cloth will keep perfectly clean.

CAMDEN LAVATORIES

CAMDEN LAVATORIES

Plate 101-H

"Cambar" Two-Fire Vitreous China Pedestal Lavatory

Rectangular Basin with Hooded Overflow, Anti-Splash Rim and Concealed Integral Supply Nozzle; fitted with Chrome Finish Artline Combination Fixture, Chrome Finish $\frac{3}{8}$ " I. P. S. CAMDEN WATER CLOSET BOWLS

Cross Section "Camden" Syphon Jet Closet Bowl

"Camden" Two-Fire Vitreous China Reverse Trap Closets

Are somewhat similar in design to the syphon jet, and while lower in cost, the same care in construction has been followed, resulting in a maximum water surface and as deep a seal as is practical for the efficient operation of a closet of this type. This bowl can be furnished with or without jet and has a quick and positive action.

Cross Section "Camden" Reverse Trap Closet Bowl

Cross Section "Camden" Washdown Closet Bowl

"Camden" Two-Fire Vitreous China Washdown Closets

Are made with and without jet, attractive in appearance and contain many sanitary features, such as large opening in bowl, maximum water surface, deep seal and large opening through trap. A bowl which will give long and efficient service and is recommended where economy is desired.

C. W. MOORE SELF-TESTING WATER-SEAL FLOOR FLANGE

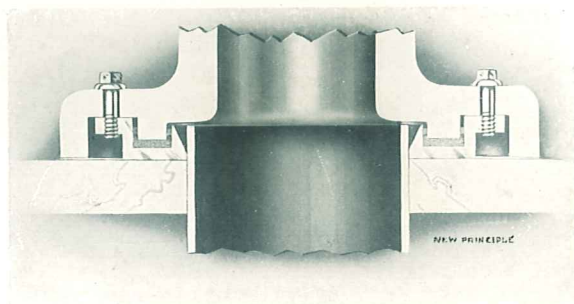

Fig. 1. Shows a central vertical cross section through the bolt-holes of the discharge end of an earthenware Water Closet and the New Principle Foot and Self-Testing Water-Seal Floor Flange.

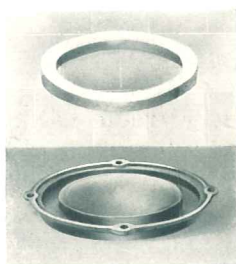

Fig. 2. Shows the New Principle Self-Testing Water-Seal Floor Flange for lead bends.

The object of the New Principle Water Closet Foot and Self-Testing Water-Seal Floor Flange is to provide a better outlet connection for water closets than has heretofore been used, by *trapping the discharge* end in a manner to make an absolutely perfect and permanent sewer-gas tight joint under all conditions, and to eliminate the unsanitary putty joint connection, which is the most unsanitary thing in the entire plumbing system.

Fig. 3. Shows the New Principle Self-Testing Water-Seal Floor Flange for cast iron bends.

One of the chief features of the New Principle Floor Flange is that it secures a perfect hygienic condition.

It has four distinct seals: 1 Water, 1 Pressure and 2 Grease.

If for any reason the *Water Closet* should become loose, the *water retained in the Water-Seal* immediately shows itself on the floor, the only thing necessary, is to tighten the bolts.

See that all Water Closets are marked —

MOORE SELF-TESTING

Patented Feb. 10, 1929; other patents pending.

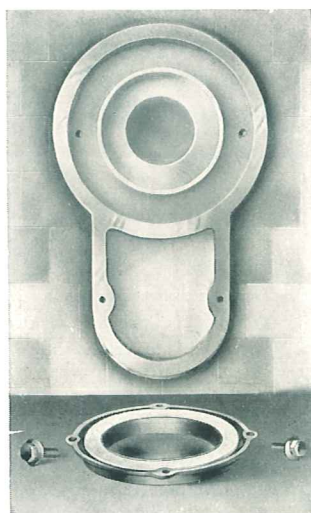

Fig. 4. Shows the New Principle Floor Flange set complete with the greased felt gasket set in recess, also Closet ready to set in place.

The New Principle Self-Testing Water-Seal Flange simplifies the setting of the bowl.

See that all Water Closets are marked —

MOORE SELF-TESTING.

GUARANTEED

SEWER GAS AND WATER-TIGHT
SELF-TESTING

The Water Closets for these Flanges are manufactured exclusively by the

Camden Pottery Company
